## THE POWER OF THE PYRAMIDS

1. Look up the country assigned to you. (Before you come to class find out where your country is located.)
2. Log onto the Internet and go to www.census.gov

Go to: People
International
World Population Information
International Data Base
Summary of Demographic Data
3. What is the estimate of the population of the world today? $\qquad$
Countries are: (Here are only a few suggestions. You can choose another country.)

| Afghanistan | Austria | Bangladesh | Botswana | Brazil |
| :--- | :--- | :--- | :--- | :--- |
| Cameroon | Congo (Brazzaville) | Denmark | Ethiopia | El Salvador |
| France | Japan | Ghana | Mexico | Nigeria |
| Qatar | Senegal | Saudi Arabia | China | South Africa |
| Zimbabwe |  |  |  |  |

My country is $\qquad$ and it is located (be specific) $\qquad$

## Answer the following questions for your country:

| What is the CBR? |  | What is the infant mortality rate? |  |
| :--- | :--- | :--- | :--- |
| What is the CBR? |  | What is the Total Fertility Rate (TFR)? |  |
| What is the CDR? |  | How has the growth rate changed since 1950? |  |
| What is the rate of natural increase? |  | What is the growth rate today? |  |
| What is the life expectancy? |  |  |  |

Go to the chart labeled Midyear Population, by Age and Sex. Print this data.

Use this data to make an age-sex histogram of your country.
For this you will need:

1. A piece of graph paper (your own or pick up a sheet in class)
2. Colored pencils or markers
3. The data you copied from the Internet

| Country $=\ldots$ |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| Age Group | Male - M | \% | Female -F | \% |
| $0-4$ |  |  |  |  |
| $5-9$ |  |  |  |  |
| $10-14$ |  |  |  |  |
| $15-19$ |  |  |  |  |
| $20-24$ |  |  |  |  |
| $25-29$ |  |  |  |  |
| $30-34$ |  |  |  |  |
| $35-39$ |  |  |  |  |
| $40-44$ |  |  |  |  |
| $45-49$ |  |  |  |  |
| $50-54$ |  |  |  |  |
| $55-59$ |  |  |  |  |
| $60-64$ |  |  |  |  |
| $65-69$ |  |  |  |  |
| $70-74$ |  |  |  |  |
| $75-79$ |  |  |  |  |
| $80-84$ |  |  |  |  |
| $85-90+$ |  |  |  |  |
| Totals: |  |  |  |  |
|  | Total Population: |  |  |  |

To construct the country's pyramid, you must first calculate the percentage of the population made up of each gender's age group. You do this by dividing each segment's population by the total population - NOT EACH GENDER. For example, if a country has a total population of $263,119,000$ and the population of males ages $\mathbf{0 - 4}$ was $10,515,000$ then

$$
10,515,000 / 263,119,000=0.04 \text { (or } 4 \% \text { ) }
$$

You must first complete the calculations for each cohort or age group. The numbers should add up to close to $100 \%$. Record these calculated values on the table included in this procedure.

After you have calculated the \% Males and \% Females, use the graph paper to make an age-sex histogram. Then answer the questions that apply to your country.

## Questions:

1. Which gender has the higher population in the youngest age groups on your pyramid? $\qquad$ Can you account for this? Explain.
2. Which gender has the higher population in the oldest age group? $\qquad$ How can you account for this? Explain.
3. Does your country look like a pyramid? $\qquad$
4. What can you tell about your country's growth rate by looking at your histogram?
5. If birth and death rates remain the same, what will your pyramid look like in 25 years?
6. What are some factors that could change the shape of your pyramid?
7. Determine the percentage of the population that has yet to reach childbearing age. What do these numbers say about the prospects for future growth?
8. If your country is not increasing in population growth rate, what are some socio-economic problems that might occur?
9. Can you determine from your graph how many people make up the population of your country? Why or why not?
10. Does your country have a baby boom in it? (a bulge in somewhere in the middle of it) $\qquad$ What could account for this?
11. If you had a business and you wanted to capitalize on your information about the population age distribution, what would you sell? And why?
12. What \% of your population is above age 65? $\qquad$
13. Does your pyramid look like that of the World Population Pyramid? $\qquad$
14. From the information graphed on your histogram, briefly discuss whether your country is increasing in population size, decreasing, at or close to ZPG.
15. From your data and histogram, would you place it in the category of developing or developed country or mid- way? $\qquad$
